

Tare Weights Stamped on Vehicle Plates

Caravan Industry Association of Australia receives numerous queries from consumers regarding the TARE weights stated on the vehicle/ trailer plate of their towable recreational vehicle. In some cases, consumers are finding that the weight, when taken over a public weighbridge, is differing by up to 300kg to what the manufacturer's compliance plate states.

We remind manufacturers that the TARE weight is the total weight of the caravan (load on tyres plus tow ball load) with all options and fittings as supplied by the manufacturer, with empty water tanks, gas bottles, and no fluids not essential for operation on public roads, and without luggage or personal effects.

MANUFACTURER: [REDACTED]		DATE OF MANUFACTURE: [REDACTED] / [REDACTED]	
VIN: [REDACTED]		VEHICLE MODEL: [REDACTED]	
BALL LOADING AT TARE: [REDACTED] KG	MAX BALL LOADING: [REDACTED] KG	RIM SIZE & PROFILE: [REDACTED]
